

24-5814

Double Prong Subscapularis Spreader

- 170 mm overall length
- Unique, double-prong design
- 80 mm max excursion (100 mm tip to tip)
- Blunted 10 mm long prongs
- 50 mm reach

Ring-handled self-retaining retractor featuring arms sweeping through an arc of nearly 90° and punctuated with two pairs of short, blunt laterally diverging tips. Each set of pairs is arranged on a yoke providing 25 mm of separation.
