Kölbel Tissue Forceps, serrated with 1x2 teeth

- 170 mm overall length
- Heavy-duty design
- Component of Deluxe and Standard Shoulder sets.
- Component of Optimal Shoulder Set
- 1x2 teeth with serrated rear platform

A well-built 175 mm long thumb forceps matched in heft and length to the task of sequestering tough capsular tissue. Grasping is assisted by serrations milled laterally on both jaws and extending 25 mm from the sturdy 1 x 2 teeth.
