

24-6008

Hollow Lumen Suture Passer

- Linen Phenolic Handle
- Length: 175 mm
- String the suture through the lumen to pass it through a bone tunnel.

A small hole, located near the blunted tip, passes through the central axis of the shaft. This “eye” is threaded with suture which may be either pushed or pulled through a previously prepared bone tunnel by the matching awl #24-6006.
