

24-6018

Kölbel Retractors, set of 3

- Blunt tips
- Get three for the price of two!

Used most often as primary retraction following initial incisions when careful peeling away of the structures making up the gleno-humeral joint is deemed important. This series of shallow, atraumatic self-retainers feature ring-handles and long sweeping arms. The bundled set of 3 includes one each of items 24-6015, 24-6016 and 24-6017 at a cost savings.
